# Scenario 1

ID: 1
Reporter: Cláudio Pimenta
Title: Book Testdrive Button - Misalignment

Description:
In the model selection page, when we select a model it shows the testdrive button and the respective close button. These two are misaligned and are overlapping the vehicle image.

Steps to Reproduce:
1. Go to the model selection page
2. Select one model

Expected output:
Align the buttons and place them below the image.

Suggestion: We should remove those buttons and when we click on a model it should redirect to the 2nd step as it's the only possible option.

Technical details:
IOS 16
Safari v16.5

Title: EQS Saloon - Missing currency to price

Description:
In the model selection page, the EQS Saloon is missing the currency character in the price.

Steps to Reproduce:
1. Go to the model selection page
2. Filter by Saloons
3. Scroll to EQS Saloon

Expected output:
All prices should have currency.

Technical details:

Title: EQS Saloon - Wrong Fuel Label

Description:
In the model selection page, the EQS Saloon has the wrong fuel label.

Steps to Reproduce:
1. Go to the model selection page
2. Filter by Saloons
3. Scroll to EQS Saloon

Expected output:
The EQS Saloon is an electric vehicle, so the label should be Electric.

Title: Showroom Map - Search Tabs Visibility

Description:
In the showroom map page, the tab Search by name is not fully visible.
Also there is no clear information of what to type in the "search by location" input.

Steps to Reproduce:
1. Go to the model selection page
2. Select a Model
3. Click "Book a Test Drive"

Expected output:
In the showroom map page, if there are only two tabs they should be fully visible.
The "Search by location" label could have "(city, postcode…)" as well so it would be easier to understand.

Suggestion: Instead of having two tabs to use different inputs, we should be able to search by address or by showroom name in the same input. For that we would just change the placeholder as something like "Search by Location or Name (city, postcode, showroom name,...)".

Title: Showroom Map - Inconsistent Capitalization

Description:
In the showroom map page, the title has inconsistent capitalization.

Steps to Reproduce:
1. Go to the model selection page
2. Select a Model
3. Click "Book a Test Drive"

Expected output:
In the showroom map page, the title capitalization should be followed through, for that it should be "Test Drive at a Showroom".

Title: Showroom Details Page - Select showroom button misaligned

Description:
In the showroom details page, the select showroom button is misaligned.

Steps to Reproduce:
1. Go to the model selection page
2. Select a Model
3. Click "Book a Test Drive"
4. Select a Showroom

Expected output:
The select showroom button should be aligned at the middle as it is the only button.

Technical details:

Title: Showroom Details Page - Replicated Information

Description:
In the showroom details page, there is replicated information, email, phone and website.

Steps to Reproduce:
1. Go to the model selection page
2. Select a Model
3. Click "Book a Test Drive"
4. Select a Showroom

Expected output:
If we are going to show the email clicking on the email button we shouldn't display the same information on the bottom, for that we should probably remove the top buttons, except for the route.
Also the bottom information should be using the same color for every field, at the moment the fax number is in a different color.

Title: Vehicle Confirmation Page - Invalid Information / Typo

Description:
In the vehicle confirmation page of the EQE Saloon, the title is referring to the wrong model.

Steps to Reproduce:
1. Go to the model selection page
2. Select the EQE Saloon model
3. Click "Book a Test Drive"
4. Select a Showroom
5. Confirm Showroom

Expected output:
In the vehicle confirmation page of the EQS Saloon model, the title should be referring to EQE Saloon and not to EQS Saloon.

Title: Vehicle Confirmation Page - Inconsistent Capitalization/ Wrong text

Description:
In the vehicle confirmation page, the request a test drive button has inconsistent capitalization, and the text is misleading since the next page is a scheduling page.

Steps to Reproduce:
1. Go to the model selection page
2. Select any model
3. Click "Book a Test Drive"
4. Select a Showroom
5. Confirm Showroom

Expected output:
To have consistent capitalization the button text should be "Request a Test Drive", and it should be "Schedule a Test Drive" as the button redirects you to a scheduling page.

Title: Vehicle Confirmation Page - Ambiguous Label

Description:
In the vehicle confirmation page, the label "upon request" is ambiguous on the purpose.

Steps to Reproduce:
1. Go to the model selection page
2. Select the EQE Saloon model
3. Click "Book a Test Drive"
4. Select a Showroom
5. Confirm Showroom

Expected output:
To be clearer the label should be "Availability Upon Request".

Title: Schedule Test Drive Date Page - Past Date Available

Description:
In the scheduling test drive page, the date picker is allowing the user to choose a past date.

Steps to Reproduce:
1. Go to the model selection page
2. Select any model
3. Click "Book a Test Drive"
4. Select a Showroom
5. Confirm Showroom
6. Request a Test Drive/ Go to Schedule Test Drive Date

Expected output:
As we are scheduling a date to do a test drive we should not be able to select a past date, for that we should disable the selection of past dates.

Title: Schedule Test Drive Date Page - Close Button

Description:
In the scheduling test drive page, there is a 'x'/close button on the top right that is unclear of its function.

Steps to Reproduce:
1. Go to the model selection page
2. Select any model
3. Click "Book a Test Drive"
4. Select a Showroom
5. Confirm Showroom
6. Request a Test Drive/ Go to Schedule Test Drive Date

Expected output:
The 'x'/close button should be replaced by a back button where it should send the user to the vehicle confirmation page.

Title: Vehicle Search Page Filter - Vehicle Type Label (Model)

Description:
The Vehicle Type dropdown has a sublabel called Models, this is ambiguous as we were already expecting it.

Steps to Reproduce:
1. Go to Vehicle Search Page
2. Open Vehicle Filters
3. Select Vehicle Type Filter

Expected output:
This information is ambiguous, maybe we could change the filter to Models and remove the "Models" label.

Title: Vehicle Search Page - Price Filter Not Working

Description:
The Sort by Price filter is not working properly, as it is displaying vehicles in the wrong order.

Steps to Reproduce:
1. Go to Vehicle Search Page
2. Open Vehicle Filters
3. Select Vehicle Type Filter

Expected output:
The second vehicle is more expensive than the third one, so it should be in swapped places as the filter is from lower to higher price.
